PRESS RELEASE

Affinity TruFrame Cabinetry Expands Custom Cabinet Services Across Denver Metro Area

Affinity TruFrame Cabinetry

July 27, 2026

ENGLEWOOD, CO - July 27, 2026 -

Affinity TruFrame Cabinetry has announced the expansion of its luxury cabinet design and manufacturing services throughout the Denver metropolitan area, responding to increased demand for its patented TruFrame design technology that combines the structural advantages of both framed and frameless cabinet construction.

The expansion comes as Colorado's luxury home improvement sector continues to demonstrate robust growth patterns, with homeowners increasingly seeking sophisticated storage solutions that blend architectural precision with functional design. The company's TruFrame technology represents a significant advancement in cabinet construction methodology, incorporating the full accessibility of frameless designs while maintaining the structural integrity traditionally associated with framed cabinetry.

"The demand for truly customized cabinetry solutions has grown substantially as homeowners recognize the value of investing in architectural furniture rather than standard cabinet installations," said Cayd Bader, owner of Affinity TruFrame Cabinetry. "Our expansion allows us to bring our patented TruFrame design and master craftsmanship to more Colorado homeowners who are seeking cabinet solutions that transcend conventional storage to become integral design elements of their living spaces."

The company offers more than forty distinct door styles, each customizable with various finishes to achieve precise aesthetic goals ranging from contemporary minimalist designs to traditional architectural styles. This extensive selection enables designers and homeowners to create cohesive interior environments that reflect individual preferences while maintaining exceptional functionality.

The company's manufacturing operations maintain strict quality control standards throughout the production process, from initial material selection through final installation. This attention to detail has established the company as a preferred partner for luxury builders and interior designers working on high-end residential projects throughout Colorado.

"Our TruFrame technology solves a fundamental challenge in cabinet design by eliminating the compromise between accessibility and structural stability," added Bader. "This innovation, combined with our commitment to exceptional craftsmanship, enables us to deliver cabinetry that meets the exacting standards of Colorado's luxury home market."

Affinity TruFrame Cabinetry maintains its design studio and manufacturing operations at its Englewood headquarters, where the company has invested in advanced production equipment and expanded its team of skilled craftspeople to support the increased service capacity. The facility serves as a collaborative hub where design concepts transform into finished products through a combination of traditional craftsmanship and modern manufacturing techniques.

About Affinity TruFrame Cabinetry

Affinity TruFrame Cabinetry specializes in the design and manufacture of high-end custom cabinetry featuring its patented TruFrame design technology. The company serves Colorado's luxury residential market with comprehensive cabinetry solutions, offering extensive customization options through more than forty door styles and multiple finish selections. Based in Englewood, Colorado, the company provides design consultation, manufacturing, and installation services for interior designers, luxury builders, and homeowners throughout the Denver metropolitan area and Colorado Front Range.
