PRESS RELEASE

Affinity TruFrame Cabinetry Expands Custom Cabinetry Services Across Denver Metro Area

Affinity TruFrame Cabinetry

March 26, 2026

Affinity TruFrame Cabinetry , a Colorado-based manufacturer of high-end custom cabinetry, announces expanded service coverage throughout the Denver metropolitan area and Colorado Front Range, bringing its patented TruFrame design technology to more homeowners and design professionals seeking premium kitchen and bath solutions.

The Englewood-headquartered company, which specializes in custom cabinetry Denver residents have relied upon for sophisticated storage solutions, now serves an extended territory including Littleton, Highlands Ranch, Cherry Hills Village, Greenwood Village, Centennial, Castle Rock, Boulder, and surrounding communities. This expansion responds to growing demand for the company's unique approach to cabinet construction that combines the advantages of both framed and frameless designs.

"The market for luxury kitchen cabinets has evolved significantly, with homeowners and designers seeking solutions that deliver both aesthetic excellence and functional superiority," said Cayd Bader, owner of Affinity TruFrame Cabinetry. "Our patented TruFrame design addresses this need by offering full accessibility within a framed cabinet structure, essentially providing clients with the best of both traditional and contemporary cabinet construction methods."

The company's proprietary TruFrame technology represents a significant advancement in cabinet engineering. Unlike conventional framed cabinets that can limit storage accessibility or frameless designs that may compromise structural integrity, the TruFrame system maintains sturdy construction while maximizing interior space utilization. This innovation has positioned the company as a preferred partner for interior designers, luxury builders, and discerning homeowners throughout Colorado.

Affinity TruFrame Cabinetry offers an extensive collection of door styles, with over forty distinct options ranging from traditional designs like Andover and Burlington to contemporary styles such as Metro and Studio. Each door style can be customized with various finishes, allowing clients to achieve precise aesthetic goals for their kitchen or bath projects. The company's showcase demonstrates successful installations across diverse architectural styles, from modern minimalist homes to classic Colorado mountain residences.

The expansion comes at a time when the luxury home improvement sector in Colorado continues to show strong growth, with particular demand for custom solutions that reflect individual lifestyle needs. The company's ability to provide both inset cabinetry for traditional aesthetics and European-style frameless options for modern spaces positions it to serve this diverse market effectively.

"We approach each project as an opportunity to create architectural furniture rather than simply installing storage units," added Bader. "This philosophy drives our commitment to precision engineering and artisan craftsmanship, ensuring that every cabinet we produce meets the exacting standards our clients expect."

The company maintains its design studio and manufacturing operations at its Englewood facility, where clients can explore the full range of door styles, finishes, and configuration options. The location serves as a hub for collaboration between homeowners, interior designers, and the Affinity TruFrame Cabinetry team to develop customized solutions for each project.

Affinity TruFrame Cabinetry is a Colorado-based manufacturer specializing in high-end custom cabinetry Denver . The company's patented TruFrame design technology combines the structural benefits of framed cabinetry with the accessibility advantages of frameless construction. Serving the Denver metropolitan area and Colorado Front Range, the company provides custom cabinet design, manufacturing, and installation services for residential kitchen and bath projects.
