

PRESS RELEASE

Dzala General Contractor Outlines Bathroom Remodeling in Tysons

Dzala General Contractor LLC

October 11, 2026

TYSONS, VA — October 11, 2026 — Dzala General Contractor LLC, a licensed and insured design-build remodeling company headquartered in Tysons, Virginia, has outlined the options, costs, and timelines for bathroom remodeling in Tysons, VA , along with how bathroom projects can be planned alongside kitchen renovations under one team.

According to the company, bathroom projects range from budget updates that keep the existing plumbing layout to full gut renovations, tub-to-shower conversions, and luxury primary baths. Budget updates typically include new fixtures, re-tiling, lighting, and paint. Luxury baths can include Kohler and TOTO fixtures, bookmatched Italian marble, and large-format stone. Walk-in showers are built with curbless or low-threshold entries, frameless glass, niches, and bench seating.

The company also builds accessible bathrooms for homeowners planning to age in place. These projects can include barrier-free showers, walk-in tubs, grab bars, non-slip flooring, wider doorways, and height-adjustable fixtures.

Dzala places particular emphasis on the work hidden behind the tile. Before finishes are chosen, the team settles waterproofing, floor slope, drain connections, and ventilation. A bonded sheet or liquid waterproofing membrane is applied across the full wet area and flood-tested before tile is set, and exhaust fans are ducted to the outside rather than into the ceiling space.

Most bathroom remodels in Northern Virginia cost between \$12,000 and more than \$60,000, depending on room size, layout changes, and finish level. Keeping a working plumbing layout costs less than relocating it, and porcelain and quartz generally cost less than Italian marble and European fixtures. Most projects take two to four weeks from demolition to final walk-through. Estimates are written and itemized and are provided after a site visit rather than over the phone.

Homeowners updating more than one room can combine a bathroom project with kitchen remodeling in Tysons, VA . Kitchen remodels in the area typically take four to eight weeks and include design, cabinetry, countertops, tile, plumbing, electrical, and ventilation work. Both project types follow the process the company detailed in its recent general contractor announcement: a free in-home consultation, 3D design approval, an itemized fixed-scope quote, and permits and inspections filed and tracked by the company. A single in-house crew and one project manager handle each project from start to finish. Work areas are sealed for dust control and cleaned daily, any changes are priced in writing with their schedule effect before approval, and debris removal and final cleaning are included in the contract.

Dzala General Contractor serves Tysons, McLean, Vienna, Oakton, Great Falls, Arlington, Alexandria, Falls Church, Reston, and Herndon in Virginia, as well as Bethesda and Potomac in Maryland. Homeowners can request a free consultation through the company's website or by calling (703) 919-1645.
