PRESS RELEASE

GBC Kitchen & Bath Outlines Bathroom Remodeling Services in Northern Virginia

GBC Kitchen and Bath Alexandria

September 25, 2026

ALEXANDRIA, Va. – September 25, 2026 – GBC Kitchen & Bath, a design-build remodeling company serving Northern Virginia, Maryland, and Washington, D.C., is highlighting its bathroom remodeling services for homeowners planning powder room updates, primary bathroom renovations, and accessibility projects. The company has served the region since 2001 and operates four showrooms in Alexandria, Ashburn, Columbia, and Rockville.

As a bathroom remodeling contractor , the company covers custom shower design and tile work, frameless shower glass installation, freestanding and built-in tubs, and vanity design and installation. Projects can also include steam shower installation, heated floor systems, custom lighting design, and bench and niche installation. When a new layout requires it, the team handles plumbing and electrical relocation along with plumbing fixture upgrades, so fixtures, drains, and lighting are placed where the finished design calls for them.

Accessibility is a defined part of the service scope. GBC Kitchen & Bath builds bathrooms intended for aging in place, with modifications that include custom shower layouts with built-in benches and niches. According to the company, the cost of a bathroom remodel is driven mainly by scope and materials, so two bathrooms of the same size can differ considerably once relocated plumbing, custom tile, frameless glass, heated floors, or steam systems are added to a like-for-like replacement.

Each project follows a four-step process. It begins with an initial consultation to review the homeowner's goals, preferences, and budget, followed by a design and planning phase that includes professional 3D renderings of the proposed space. Construction and installation are managed in-house by a dedicated project manager and completed by experienced, insured trade professionals working under the company's direction. A final walkthrough then confirms that the finished work meets the agreed specifications before the project is closed out.

Bathroom projects are available throughout the company's service area, which includes Fairfax, Loudoun, Arlington, and Prince William counties in Virginia, Montgomery and Howard counties in Maryland, and neighborhoods across Washington, D.C. such as Capitol Hill, Georgetown, and Dupont Circle. Recent bathroom work documented in the company's project gallery includes renovations in Arlington, Vienna, and Haymarket, Virginia, as well as a primary bathroom remodel in Rockville, Maryland. These projects range from compact hall bathrooms to larger primary suites with freestanding tubs and walk-in showers, reflecting the variety of layouts the design team plans for across older and newer homes in the region.

The bathroom division operates alongside the company's kitchen, cabinet, countertop, and basement services. GBC Kitchen & Bath recently outlined its lower-level work in a separate announcement on basement remodeling in Alexandria , which covered entertainment rooms, home offices, guest suites, bathroom additions, and egress window installation for homeowners converting underused lower levels.

GBC Kitchen & Bath reports more than 6,000 customers served and provides a three-year workmanship warranty covering bathroom, kitchen, and basement remodeling projects. The company is licensed, insured, and bonded, and has been recognized by Houzz and Angi. Its showrooms display vanity, tile, countertop, flooring, and steam shower options that homeowners can review in person during the design phase, and virtual design meetings are also available for those who prefer to begin planning remotely.
