PRESS RELEASE

GBC Kitchen & Bath Extends Basement Remodeling Services to Columbia and Ellicott City Homeowners

GBC Kitchen and Bath - Columbia

September 24, 2026

COLUMBIA, MD – September 24, 2026 – GBC Kitchen & Bath , a design-build remodeling company serving the Washington, D.C. metro area since 2001, has extended its basement finishing services to homeowners in Columbia, Ellicott City and surrounding Howard County communities through its Columbia showroom.

The move follows the company’s recent expansion of kitchen remodeling in Ellicott City and adds lower-level renovation to the full-service work already available to Howard County clients. With many homes in the area built with unfinished or partially finished basements, the service is aimed at households looking to add usable living space without building an addition.

GBC’s Basement Remodeling projects cover the full scope of a lower-level renovation, from waterproofing and framing to electrical, plumbing and final finishes. Common projects include entertainment and media rooms, home offices, guest suites, and basement bathrooms and wet bars. The company also handles egress window installation, laundry relocation, custom storage and flooring, with moisture control addressed before finish materials are installed.

Each project follows a four-step process. It begins with an initial consultation to discuss goals and budget, followed by design and planning with detailed drawings. Construction and installation are then carried out by licensed trade professionals under in-house project management, and the project closes with a final walkthrough. According to the company, all work is completed in compliance with applicable building codes.

Basement clients have access to the same resources used on GBC’s kitchen and bathroom projects, including custom cabinetry for wet bars and storage walls, countertop fabrication, vanities and flooring. Each client is assigned a dedicated project manager, and basement projects are backed by a three-year workmanship warranty.

GBC Kitchen & Bath is fully licensed, insured and bonded, and operates four showrooms in Columbia and Rockville, Maryland, and Alexandria and Ashburn, Virginia. The company reports serving more than 6,000 clients across Northern Virginia, Maryland and Washington, D.C., and has received Best of Houzz 2025 recognition.

Howard County homeowners can visit the Columbia showroom at 9204 Berger Road or contact the team to schedule a consultation.
