PRESS RELEASE

GBC Kitchen & Bath Guides Kitchen Remodels in Laurel and Clarksville

GBC Kitchen and Bath - Columbia

November 06, 2026

COLUMBIA, MD - GBC Kitchen & Bath is clarifying how homeowners planning kitchen remodeling in Laurel and kitchen remodeling in Clarksville work with the Columbia showroom at 9204 Berger Rd Ste E. The showroom sits in Howard County and serves both communities, which sit a short drive apart but often fall under different permit offices.

“Laurel and Clarksville are close on the map, but the permit path can change from one address to the next,” said Esin Mills, director of operations at GBC Kitchen & Bath. “Confirming the county before design starts keeps the kitchen plan aligned with the right inspections.”

For Laurel, the mailing address alone does not decide the jurisdiction. North Laurel homes in Emerson and along the Whiskey Bottom Road corridor fall under Howard County Department of Inspections, Licenses and Permits, while South Laurel and West Laurel addresses, including Montpelier, Oaklands and Bond Mill, generally go through Prince George’s County DPIE. Parts of the wider Laurel area near Maryland City sit in Anne Arundel County, and the company confirms the county for each address before design work begins.

That county line also shapes older Laurel housing stock. Homes near Main Street often need attention to original plumbing and wiring once walls are open, and exterior changes in or near the city historic district can require a separate city check. Postwar neighborhoods more often ask for an open wall between kitchen and dining room or a larger walk-in shower in place of a tub-shower combination.

Clarksville kitchen projects are planned under Howard County rules from the same Columbia team. Homes in River Hill may also need village architectural committee review when a range hood vent, window or door changes the exterior, even when the interior kitchen work itself does not. Interior pull-and-replace work in 1990s River Hill kitchens is a common scope, while older parcels along Route 108 may need a closer look at electrical and plumbing before a layout is locked.

Homeowners can compare cabinets, countertops and tile in person at the Berger Road showroom and find the listing for the GBC Kitchen & Bath Columbia showroom on Google Maps . Kitchen projects typically move through consultation, design and planning with 3D visualization, installation managed by a dedicated project manager, and a final walkthrough. Completed kitchen, bathroom and basement projects carry a three-year workmanship warranty.

GBC provides kitchen remodeling services that cover custom cabinets, countertops, islands, lighting, flooring and layout changes when the design calls for them. Local details for each town are posted on the Laurel location page and the Clarksville location page .

Showroom hours are Monday through Friday from 9 AM to 5 PM and Saturday from 10 AM to 3 PM. Homeowners can request an in-home estimate by calling +1 410-417-6060. The Columbia location is one of four GBC showrooms, alongside Alexandria, Ashburn and Rockville.
