

PRESS RELEASE

GBC Kitchen and Bath Extends Kitchen Remodeling to Laurel, MD

GBC Kitchen and Bath - Columbia

October 28, 2026

LAUREL, MD — October 28, 2026 — GBC Kitchen and Bath, a design-build remodeler serving the Washington, D.C. metropolitan area since 2001, has extended its kitchen remodeling in Laurel to homeowners in North Laurel, South Laurel, and West Laurel. Projects are planned and supported from the company's Columbia, Maryland showroom on Berger Road, the nearest GBC showroom to the Laurel area.

The service covers full kitchen design and construction, including custom cabinetry, countertops, islands, backsplashes, lighting, flooring, and appliance integration. According to the company, many Laurel-area homeowners want to open older, closed-off layouts or add a working island, and GBC can handle load-bearing wall removal when the design calls for it. The company also replaces countertops or multiple cabinets for smaller projects. It does not offer cabinet refacing, refinishing, or repair-only work.

Neighborhoods served include Emerson, the Savage border, and the Whiskey Bottom Road corridor in North Laurel, as well as Montpelier, Oaklands, and the Laurel Lakes border in South Laurel. West Laurel homes are served from the same showroom. Homeowners in nearby areas can contact the Columbia showroom to confirm coverage.

Each kitchen follows four stages: an initial consultation to discuss goals and budget, design and planning with 3D visualization, construction and installation, and a final walkthrough with the homeowner. Homeowners approve the layout, cabinets, and finishes in 3D before demolition begins. At the Columbia showroom, they can compare cabinet lines including Medallion, Forevermark, Waypoint, Fabuwood, Design-Craft, Marsh, and Marquis, along with granite, quartz, and natural stone countertops, tile, and hardware.

Esin Mills at GBC Kitchen and Bath, said: "Laurel has a lot of homes where the kitchen layout hasn't changed in decades. Homeowners usually know what isn't working, but they need to see the new layout before they commit. Planning it in 3D and choosing materials in our Columbia showroom gives them that confidence before any work starts."

A dedicated project manager coordinates GBC's own carpenters and tile installers along with specialist trades for countertops, custom glass, electrical, and plumbing. Because the Laurel area crosses several local jurisdictions, GBC applies for permits and coordinates inspections with the jurisdiction that applies to each home. Written proposals include material allowances for each category, and completed kitchens are covered by a three-year workmanship warranty.

The Laurel expansion follows the Columbia showroom's recent update on bathroom remodeling and kitchen services for Howard County homeowners. Kitchen and bathroom projects can be planned together so cabinetry, countertops, and fixtures stay consistent across the home.

GBC Kitchen and Bath operates four showrooms in Alexandria and Ashburn, Virginia, and Rockville and Columbia, Maryland. The Columbia showroom at 9204 Berger Road is open Monday through Friday from 9 a.m. to 5 p.m. and Saturday from 10 a.m. to 3 p.m. Laurel homeowners can request a free in-home estimate by calling (410) 417-6060, and the company responds to inquiries within one business day.
