PRESS RELEASE

Home Revive Liquidators Announces Expanded Operations for Home Liquidation Store in Maryland

Home Revive Liquidators

July 28, 2026

July 28, 2026 -

Home Revive Liquidators announces the expansion of its operations throughout the Maryland metropolitan area, increasing warehouse capacity and inventory availability to serve growing regional demand for kitchen and bathroom remodeling materials at liquidation prices. The expansion includes increased staffing at the company's Gambrills showroom location and enhanced inventory procurement operations to maintain consistent stock levels for contractors and homeowners.

The operational expansion, which began implementation in the third quarter of 2024, addresses increased customer volume from Anne Arundel County and the greater Baltimore-Washington region. The company has added twelve new staff members and expanded its warehouse space by 8,000 square feet to accommodate larger inventory volumes of overstock home goods from manufacturing partners.

"Our expansion reflects the increasing demand we've observed from both professional contractors and individual homeowners seeking alternatives to traditional retail pricing," said Ryan Vazquez of Home Revive Liquidators. "By expanding our warehouse capacity and procurement operations, we can maintain consistent inventory levels and reduce wait times for customers who need materials for time-sensitive projects."

The expanded operations enable the home liquidation store to maintain larger quantities of in-stock inventory, including kitchen cabinets, bathroom vanities, and flooring materials sourced directly from manufacturer overruns and discontinued product lines. The company reports that its inventory turnover has increased by 40 percent over the past six months, necessitating the operational expansion.

The Gambrills facility now stocks over 500 different SKUs of kitchen and bathroom products, with inventory refreshed weekly through direct manufacturer relationships. Products include solid wood construction cabinets with soft-close hinges, bathroom vanities in various sizes and finishes, and flooring options ranging from luxury vinyl plank to engineered hardwood. The expanded warehouse space allows for display areas where contractors and homeowners can view products before purchase.

Home Revive Liquidators serves multiple customer segments throughout Maryland, including general contractors managing multiple projects, property investors renovating rental units, and individual homeowners undertaking DIY renovations. The company has established contractor accounts with over 200 regional businesses and processes an average of 150 customer transactions weekly.

The expansion coincides with industry data showing increased renovation activity in the Maryland region. According to recent building permit data, bathroom and kitchen remodeling projects in Anne Arundel County have increased by 23 percent year-over-year, creating demand for readily available materials at various price points.

"The expansion positions us to better serve the Maryland market's renovation needs," added Vazquez. "With our increased capacity, we can maintain the inventory depth that contractors require while also serving individual homeowners who may need smaller quantities for their projects."

The company's business model focuses on acquiring excess inventory directly from manufacturers, including overruns, discontinued lines, and specification changes. This approach allows for pricing that typically ranges from 40 to 90 percent below traditional retail, though specific discounts vary based on product type and manufacturer agreements.

Home Revive Liquidators operates a showroom and warehouse facility in Gambrills, Maryland, specializing in the distribution of kitchen cabinets, bathroom vanities, flooring, and related home improvement materials sourced from manufacturer overstock and surplus inventory. The company serves the Maryland metropolitan area with a focus on providing immediate product availability for renovation projects.
