

PRESS RELEASE

KNB Cabinets Outlines Shaker and Euro Lines for Nashville Builders

KNB Cabinets Wholesale TN

October 13, 2026

NASHVILLE, TN — October 13, 2026 — KNB Cabinets Wholesale TN , a Nashville supplier of Wholesale Kitchen Cabinets TN builders and dealers rely on, has outlined how its Shaker and Euro collections are matched to different project types across Middle Tennessee, from traditional single-family homes to downtown condos and multifamily units.

The Shaker collection is aimed at traditional and transitional homes, while the frameless Euro collection is designed for condos, apartments, and modern renovations, with High Gloss, Matte, and Textured Woodgrain finishes. Both lines share the same construction standards: plywood cabinet boxes, solid wood dovetail drawers, and soft-close hardware.

Because inventory is stocked locally in Nashville, contractors can often schedule installation around their own build calendar instead of waiting on import lead times that can run several months. The company sells only to trade professionals, including builders, dealers, remodelers, and interior designers.

The company points to a recent condo renovation in The Gulch as an example. According to KNB Cabinets, the project came in about 33% below a comparable import estimate, and in-stock cabinets replaced a quoted lead time of 12 to 14 weeks with same-week availability. Matching bathroom vanities are also available, so builders can source kitchen and bath cabinetry from one supplier.

“Builders don’t need more options on paper; they need the right cabinet on site when the schedule calls for it,” said [Full Name], [Title] of KNB Cabinets Wholesale TN. “Keeping Shaker and Euro stock here in Nashville and planning every filler and end panel in the design stage helps our partners avoid delays and change orders.”

Projects start with measurements sent by the contractor or dealer. The design team returns a 3D rendering and an itemized quote, typically within 24 to 48 hours, and accounts for fillers, end panels, and trim before an order is placed. Cabinets are then delivered directly to job sites and showrooms throughout greater Nashville.

The update builds on the company’s recent expansion of its wholesale kitchen cabinets program for Nashville dealers and builders. The team brings more than 40 years of combined cabinetry and kitchen design experience and serves partners from The Gulch and East Nashville to communities across Middle Tennessee. Trade professionals can apply for a wholesale account through the company’s website.
