

PRESS RELEASE

Silveristic Details Its Personalized Pet and Memorial Jewelry Line

Silveristic Jewelry

October 30, 2026

ALLEN, TX - Silveristic, a family-run personalized jewelry brand, has outlined the 31 pieces in its pet and memorial jewelry collection. The line includes necklaces, bracelets, rings and earrings that can carry a paw print, a pet's name, an initial or a meaningful date.

"Some customers come to this collection to celebrate a pet at home and others to remember one, so both kinds of pieces sit on the same page," said Ron Garcia, brand manager at Silveristic. "Each piece is made to order from the design summary the customer reviews."

The pieces are designed for dogs, cats and other companions. The full pet jewelry collection shows celebration and memorial pieces together on a single page.

Necklaces make up most of the range, with 18 designs. These include an engraved pawprint necklace, a sideways paw initial necklace, a dog ear name necklace, an engraved dog bone necklace and a name necklace designed to list several pets on one piece.

The six bracelet designs include a paw letter bracelet that can be personalized with a paw charm and up to six letters, along with cat face and engraved heart options. The ring and earring designs follow the same approach, with double sided paw print rings, paw birthstone rings and engraved paw threader earrings.

Most pieces are made in 925 sterling silver and are offered in gold, silver and rose color finishes. Selected designs, such as the paw print bracelet and an engraved pawprint necklace, are also available in 14K solid gold.

Every personalized piece is made to order, one at a time. Before an item can be added to the cart, the site repeats the configured design back as a summary, and Silveristic states that a piece is corrected or remade if it does not match that summary.

The brand has also added pet memorial as a gift occasion on its site, alongside a pet lover recipient category. Shoppers who are unsure where to start can use the Gift Finder , which asks up to nine optional questions and returns a shortlist at the end.

For customers who want background before choosing a piece, the brand's pet jewelry journal includes articles on memorial rings and on choosing jewelry for animal lovers. The collection page itself explains the difference between celebratory pet jewelry and memorial pieces meant to mark a loss.

The collection is available on the Silveristic website, where each product page lists its material, finish options, chain or band lengths and personalization steps. Necklace chains on the paw name necklace, for example, are offered in lengths from 14 to 22 inches, while the paw letter bracelet comes in sizes from 5 to 8 inches. Customers with questions about spelling, symbol order or materials can reach the team through the contact form on the site before placing an order.
