PRESS RELEASE

Synergy Cabinets Expands Premium Kitchen Cabinet Collections and Custom Millwork Solutions Across the Region

Synergy Cabinets

September 21, 2026

ORLANDO, Fla. — Synergy Cabinets has announced the expansion of its design collections, offering homeowners, home builders, and interior designers direct access to high-performance cabinetry, precision craftsmanship, and personalized layout planning. The company’s expanded product line delivers tailored storage, durable materials, and modern finishes engineered to elevate residential and multi-family living spaces.

Recognizing that modern home design demands both everyday functionality and aesthetic appeal, the company has introduced an expanded lineup of custom kitchen cabinets crafted to meet precise architectural requirements. Homeowners and contractors can choose from a broad spectrum of configurations, including transitional shaker profiles, minimalist flat-panel European slab doors, and detailed traditional millwork. Each collection integrates premium soft-close hardware, full-extension dovetail drawer boxes, durable moisture-resistant finishes, and versatile organizational accessories such as roll-out pantries, concealed spice racks, and corner pull-out systems.

To make the selection process seamless and collaborative, Synergy Cabinets offers comprehensive planning resources through its modern design center. Homeowners planning complete kitchen remodels, custom closet installations, or bathroom vanity upgrades can consult with experienced cabinet design specialists. Through 3D design rendering and layout planning, clients can visualize finish selections, hardware pairings, and space optimization strategies before production and delivery begin.

Beyond customized bespoke millwork, Synergy Cabinets functions as a dependable local kitchen cabinet store serving both retail consumers and trade professionals. General contractors, real estate developers, and remodelers benefit from streamlined project quotes, reliable production lead times, and dedicated trade account support that keeps residential builds on schedule and within budget.

"Cabinets serve as the functional anchor of every home remodel, influencing daily routines as much as visual style," said the design team at Synergy Cabinets. "Our expanded lineup allows clients to achieve high-end craftsmanship, personalized storage efficiency, and enduring quality with full confidence in project delivery."

The firm works closely with local clients from concept consultation through material sourcing and final delivery, ensuring every cabinet box, door, and drawer fits the exact dimensions of the intended layout. By pairing durable hardwoods with modern engineering, the brand delivers custom cabinetry that stands up to daily wear while increasing property resale value.

Synergy Cabinets invites homeowners, architects, and remodelers to explore the latest kitchen and bath collections, schedule one-on-one layout consultations, and review door samples online.

Synergy Cabinets is a premier cabinetry provider specializing in custom kitchen and bath cabinets, pantry storage, and architectural millwork for residential and trade clients. Combining superior craftsmanship, innovative hardware solutions, and dedicated design assistance, the company helps homeowners and commercial builders transform living spaces with functional, elegant storage.
