PRESS RELEASE

Trendy Cabinets Outlines Five-Tier Cabinet Line Structure for Atlanta-Area Kitchen, Bath, and Closet Projects

Trendy Cabinets Kitchen, Bath & Closet

September 28, 2026

ROSWELL, GA — September 28, 2026 — Trendy Cabinets Kitchen, Bath & Closet, a cabinet design and remodeling company based in Roswell, Georgia, has outlined the five-tier line structure behind its Luxury Custom Cabinets in Atlanta , giving homeowners a clearer way to compare construction, finish, and hardware options before starting a kitchen, bathroom, or closet project.

The structure organizes the company’s cabinetry into five lines: Essence, Prime, Elite, Majestic, and Imperial. Each line is defined by a distinct combination of wood grade, finish process, and standard hardware, allowing homeowners to match cabinet specifications to the scope of their project and the level of daily use a room will receive.

The Imperial line uses premium-grade solid wood with hand-applied finishes, soft-close hinges, and custom design options, and is intended for kitchens where detailing and joinery are a primary focus. The Majestic line uses high-quality wood with smooth, durable finishes in modern and classic colors, along with soft-close drawers and expanded storage options. The Elite line combines solid and engineered wood and is offered in stains, paints, and current color options with customizable storage configurations.

The Prime line is built with durable wood options, a range of popular finishes, and functional storage, and is positioned for homeowners balancing style with budget. The Essence line uses standard-grade wood with neutral finishes, easy-to-clean surfaces, and essential hardware, suited to simpler layouts and everyday use.

The tiered structure builds on the company's recently introduced Premium American Cabinets collection, which centers on face-frame construction for traditional and transitional home styles. Homeowners can also compare the five lines with the company's frameless European, inset, and full or partial overlay cabinet options, all of which are available for side-by-side review in the Roswell showroom.

According to the company, presenting cabinetry by line helps homeowners see where differences in materials and hardware affect long-term durability and daily function. Details such as drawer slide type, hinge mechanism, box construction, and finish application are difficult to evaluate from photos alone, which is why the showroom displays door samples, finishes, and hardware from several lines together.

Projects begin with a design consultation, held in the showroom or in the home, followed by in-home measurement, design finalization, ordering, and delivery and installation by the company's own team. Cabinet selections can be coordinated with quartz, granite, and marble countertops, bathroom vanities, backsplash, and closet storage, allowing several rooms to be planned as a single project rather than as separate purchases. According to the company, straightforward cabinet installations typically take one to three days, while projects involving layout changes or full cabinet replacement follow a longer timeline outlined in the project proposal.

Trendy Cabinets Kitchen, Bath & Closet serves homeowners across the greater Atlanta area, including Roswell, Alpharetta, Johns Creek, Sandy Springs, Dunwoody, Marietta, Buckhead, Milton, and Brookhaven. The showroom at 4401 Shallowford Road, Suite 156, is open Monday through Saturday from 10 a.m. to 6 p.m., with Sunday visits available by appointment. Design consultations and estimates are provided free of charge.

Photo galleries and construction details for all five collections are available on the Trendy Cabinets cabinet lines page, where homeowners can also request a design consultation.
