Trendy Cabinets Details How Its Kitchen Cabinets Are Built

Trendy Cabinets Kitchen, Bath & Closet

October 11, 2026

ROSWELL, GA — October 11, 2026 — Trendy Cabinets , a kitchen, bath, and closet showroom in Roswell, Georgia, has published the construction standards and planning timeline behind its Kitchen Cabinets , giving Atlanta-area homeowners a clearer view of how cabinets are built and what to expect between the first consultation and installation day.

According to the company, its custom kitchen cabinets are made to measure for each room rather than built in fixed widths. Semi-custom lines are typically produced in set size increments of about three inches, which can require filler strips to close gaps along walls and appliances. Made-to-measure cabinets are sized to the actual space, allowing runs to fit more closely around windows, corners, and appliances.

Cabinet boxes are built from three-quarter-inch hardwood plywood with solid wood face frames, dado-mounted bottoms, and reinforced corner blocks. Drawers are solid wood with dovetail joinery, and solid wood doors use five-piece construction joined with mortise-and-tenon joints. Wood species include maple, cherry, and red and white oak, in Shaker, slab, raised-panel, and glass-front door styles.

Painted cabinets are finished with a catalyzed conversion varnish applied in multiple sanded coats and available in an unlimited range of colors. Stained and clear finishes are also offered for homeowners who want the natural grain of cherry or oak to show. Two-tone kitchens, such as a wood-stained island paired with painted perimeter cabinets, are available as well. Standard hardware includes European concealed hinges rated for more than 200,000 cycles with soft-close damping, and full-extension, undermount soft-close drawer slides.

The company also outlined its typical project timeline. Design development takes one to two weeks and includes CAD floor plans, elevation drawings, 3D renderings, and physical material samples, with revisions completed before production begins. Manufacturing typically takes six to eight weeks, and installation by the company's own team takes two to five days, bringing most projects to eight to 12 weeks from design approval. Consultations and estimates are free and can take place at the Roswell showroom or in the home.

The construction details apply across the company's cabinet range, which builds on its Premium American Cabinets collection and five-tier line structure. Frameless European, inset, and full and partial overlay cabinets can be reviewed side by side at the showroom, where door samples, finishes, hinges, and drawer slides are on display. Kitchen cabinets can be planned together with quartz, granite, and marble countertops, backsplashes, bathroom vanities, and closet systems. Financing is available through partner lenders.

Trendy Cabinets serves homeowners throughout greater Atlanta, including Roswell, Alpharetta, Johns Creek, Milton, Sandy Springs, Dunwoody, Marietta, Buckhead, Brookhaven, East Cobb, and Cumming. The showroom at 4401 Shallowford Road is open Monday through Saturday from 10 a.m. to 6 p.m., with Sunday visits by appointment.
