PRESS RELEASE

United Granite LLC Expands Kitchen Countertops Selection to Over 2000 Colors Across North Carolina Triangle Area

United Granite LLC

July 21, 2026

United Granite LLC has expanded its showroom inventory to feature over 2000 colors across 120 full slabs, strengthening its position as a premier stone fabrication destination in the North Carolina Triangle area. The expansion addresses growing demand for natural and engineered stone surfaces as homeowners increasingly view countertop upgrades as essential home value enhancements.

The expanded inventory includes an extensive range of natural stones such as granite, marble, onyx, and soapstone, alongside engineered stone options from leading manufacturers including Cambria, Silestone, Caesarstone, MSI Quartz, and Cosmos Surfaces. This comprehensive selection enables homeowners and design professionals to view full slab sections in the showroom before making their final selections.

"The expansion of our inventory reflects our commitment to providing the Triangle area with unmatched selection and quality," said Orcun Aydin, speaking for United Granite LLC. "With over 30 years of experience in stone fabrication, we understand that Kitchen Countertops are more than functional surfaces—they transform living spaces and reflect the character of each home. Our expanded showroom allows customers to experience the full beauty of each stone option before making their investment."

The company's full-service approach distinguishes it from other stone fabricators in the region. Every project follows a comprehensive process that includes showroom consultation, professional measurement, state-of-the-art CNC fabrication, and expert installation. All services are handled by a single team without subcontractors, ensuring consistency and accountability throughout each project.

Custom Countertops remain the company's core specialty, with applications extending beyond kitchens to include bathroom vanities, bartops, fireplace surrounds, and stone flooring for both residential and commercial properties. The company's in-house CNC fabrication technology and extensive on-site inventory enable industry-leading lead times that surpass most Triangle-area competitors.

The expansion also enhances the company's Trade Professional Program, which provides dedicated pricing and project coordination services for builders, interior designers, and contractors throughout the region. This program has established the company as a trusted partner for professionals managing multiple projects requiring consistent quality and reliable delivery schedules.

The timing of the expansion aligns with increased home improvement activity across the Triangle area, where premium stone surfaces rank among the highest return-on-investment home upgrades available. Industry data indicates that quality countertop installations can recoup 70-80 percent of their cost at resale while significantly enhancing daily living experiences.

United Granite LLC operates as a licensed and insured contractor in North Carolina, maintaining a showroom and fabrication facility that serves Durham, Raleigh, Chapel Hill, Cary, Apex, and surrounding communities. The company has earned 255 verified Google reviews, reflecting its reputation for quality craftsmanship and customer service developed over three decades in the stone fabrication industry. The showroom features digital tools including an EZ Quote system and comprehensive countertop buying guides to assist customers in their selection process.
